JUNE 2007

The project was kicked off with a pre-construction meeting held on June 14th. Notice to proceed was issued the following day that accepted the alternate schedule proposed by Maino Construction, which is reflected below. Construction began on site on June 18th and a ground breaking ceremony was held to kick off construction on the 19th.

OPSC Funding

- As reported previously, on May 30th, the District received a 15-day letter from OPSC for the new construction grant requiring response by June 14th. On June 4th, the District received the site development grant review portion of the review that was missing from the May 30th letter. On June 5th the District received the detailed analysis of the site development grants needed to form the response by June 14th. The District originally requested site grants of $1,194,000 with the expectation that some reduction would occur after State input. The initial evaluation by the State placed our grant value at $800,000. On June 13, the District received a document needed from PG&E to substantiate $25,000 of costs and sent the response to OPSC with an amended application for $1,068,000 in site grants.

- On June 25th the District received the State's 4-day letter, with a total grant amount of $990,000. On June 26th, the District sent the final application in concurrence with the State's 4-day recommendation.

- On May 30th, the District also received a 15 day letter from OPSC for our modernization grant. The District provided the data that they requested along with a revised application by the June 14th deadline. OPSC reported that the application was complete.

- On June 27th, the District received via mail a 7 day letter regarding our joint use funding application for the Library. The letter was dated June 22nd, and gave the District until June 29th to respond. A response package was sent via overnight mail on June 28th.

Site Improvements

- Mass excavation/rough grading of the site commenced.
